ARKTOKEN

Here's a step-by-step guide on how to import a custom token like ArkToken on MetaMask using the Binance Smart Chain:

Guide to Import ArkToken into MetaMask

Step 1: Add Binance Smart Chain to MetaMask

If you haven't already added Binance Smart Chain (BSC) to MetaMask, follow these steps:

1. **Open MetaMask**:

   o Click on the MetaMask extension in your browser or open the app.

2. **Switch to the Networks Section**:

   o Click the network dropdown at the top of the MetaMask window (it usually says "Ethereum Mainnet" by default).

3. **Add Network**:

   o Select **"Add Network"** and enter the following details:

      ▪ **Network Name**: Binance Smart Chain

      ▪ **New RPC URL**: https://bsc-dataseed.binance.org/

      ▪ **Chain ID**: 56

      ▪ **Currency Symbol**: BNB

      ▪ **Block Explorer URL**: https://bscscan.com/

   o Click **Save**.

Your MetaMask is now configured for Binance Smart Chain.

Step 2: Obtain the Contract Address for ArkToken

1. **Find the Contract Address**:

   o If you created ArkToken, use the contract address from your deployment.

   o Alternatively, check the token details on BscScan.

Example:

ArkToken Contract Address: **0x3e28B89Bd6cFaBAddD790131F340A176937Be328**

Step 3: Import ArkToken into MetaMask

1. **Open MetaMask**:

   o Log in to MetaMask and ensure it's connected to Binance Smart Chain.

2. **Click "Import Tokens"**:

   o Scroll down on the main account page and select **"Import Tokens"**.

3. **Add Custom Token**:

   o Go to the **Custom Token** tab and input the following:

     ▪ **Token Contract Address**: 0x3e28B89Bd6cFaBAddD790131F340A176937Be328

     ▪ **Token Symbol**: ARKT (or your token's symbol)

     ▪ **Decimals of Precision**: 18 (or as specified during creation)

   o Click **Add Custom Token**.

4. **Confirm Import**:

   o Verify the token details and click **"Import Tokens"**.

Step 4: Verify ArkToken in MetaMask

1. **Return to MetaMask Wallet**:

   o You should now see ArkToken (ARKT) listed under your assets.

   o The balance will reflect the number of ArkTokens in your wallet.

Troubleshooting Tips

- If you don't see your tokens, confirm that the contract address is correct.

- Ensure you're connected to the Binance Smart Chain network.

- Double-check the token decimals and symbol.

By following these steps, you can successfully import and manage your custom token, ArkToken, using MetaMask.

Note: You need to have the MetaMask app on your mobile device or installed as a browser extension.
